PROGRAMME PROJECT REPORT

Introduction

The Programme leading to the award of Master of Computer Applications (MCA) is developed to prepare students to take up a career in the field of IT and Computer Applications. This is a Post Graduate Programme where students are exposed to various areas of Computer Applications including the latest developments in the Industry.

1. Programme's Mission and Objectives

To afford a Quality Postgraduate Degree in Information Technology (MCA) through Online Learning mode to impart high quality training to students using the latest tools in computer technology. To upkeep the high standard of education, the academic syllabus is designed keeping in view the latest trends and technologies in the field of Computer Science. The coursework is designed to be flexible and wide-ranging, incorporating cutting edge technology and ensuring that the students have a firm grasp on the core fundamentals of IT, and its applications.

The objectives of the programme are to enable students:

- To work productively as IT professionals both at supportive and leadership roles
- To advance successfully in their chosen career path utilizing technical abilities, leadership qualities, communication, and interpersonal skills with high regard to legal and ethical responsibilities, in IT domain.
- To build their profession adaptable to the changes in technology, with lifelong learning

2. Relevance of Programme with Manipal University, Jaipur Mission and Goals

In order to align with the mission and goals of Manipal University Jaipur, the Online MCA Programme is planned to enable students and working professionals gain knowledge in various domains of IT, specialize in a domain of their choice, gain knowledge of not only IT, but also managerial skills including analysis, data based decision making and entrepreneurship, in newer and emerging markets, products and technologies.

Vision

Global Leadership in Higher Education and Human Development

Mission

- Be the most preferred University for innovative and interdisciplinary learning
- Foster Academic research and professional excellence in all domains
- Transform young minds into competent professionals with good human values.

3. Nature of Prospective Target Group of Learners

It is by now well accepted that an MCA degree is an important tool for professionals to contribute to business in all areas of IT, expand their career options and move up their career ladder, acquire Leadership skills or embark on an entrepreneurial journey.

This Online programme has been designed for conventional learners, as well as working professionals and other individuals aspiring to acquire knowledge and associated academic credentials. Considering that all candidates interested in pursuing a degree may not be able to afford the same through a campus mode for reasons of paucity of time or financial constraints, online delivery is a feasible option to enable them to acquire knowledge and skills. Delivery through this mode also contributes towards Gross Enrolment Ratio (GER) of 50% by 2035, as envisaged by the Government of India.

The programme is so designed that the prospective students who may not be able to afford full time, residential MCA are provided with high value learning, anytime, anyplace, at one's own pace.

4. Appropriateness of programme to be conducted in Online mode to acquire specific skills and competence

The courses in the programme are delivered through Self-Learning e-Module which is a modular unit of e-learning material which is inter-alia self-explanatory, self-contained, self-directed at the learner, and amenable to self-evaluation, and enables the learner to acquire the prescribed level of learning in a course of study and includes contents in the form of a

combination of the following e-Learning content, and made available through four-quadrant approach namely,

(a) e-Tutorial - faculty led Audio - Video Lectures, (b) e-Content (combination of PDF/ epub) Text Materials, (c) Discussion forum for raising of doubts and clarifying the same on real time basis by the Course Coordinators/Course Mentors assigned to students (d) Self- Assessment Quiz, Test and Assignments to reinforce learning. Reference books are also mentioned in the syllabus. Latest Edition of Reference books may be referred to.

A robust Learning Management System that keeps track of delivery of e-Learning Programmes, learner's engagement, assessment, results and reporting in one centralized location, is in place. All of the above can be done/delivered by online and other platforms without much loss of fidelity. Hence the MCA programme is suited for Online mode of learning.

5. Instructional Design

5.1. Curriculum design

Curriculum has been designed by experts in the area of Management and Information Technology and care has been taken to include contemporary topics, as well as topics that also inculcate environmental awareness in students. The curriculum and syllabus are approved by the Board of Studies, Centre for Internal Quality Assurance (CIQA) and University Academic Council which consists of experts from Academia and Industry.

5.2. Programme structure and detailed syllabus

5.2.1. Programme Structure

Master of Computer Applications

| Course Key | Course | Credits | |
|--------------------------|--|---------|--|
| l year First Semester | | | |
| DCA6101 | Fundamentals of Computer and IT | Bridge | |
| 20/10101 | | Course | |
| DCA6102 | Programming in C | 4 | |
| DCA6103 | Foundation of Mathematics | 4 | |
| DCA6104 | Advanced Database Management System (DBMS) | 4 | |
| DCA6105 | Computer Architecture | 4 | |
| DCA6130 | Programming in C – Practical | 2 | |
| DCA6131 | Advanced DBMS – Practical | 2 | |

| | Second Semester | |
|-----------------|---|----|
| DCA6201 | Operating System | 4 |
| DCA6202 | Advanced Data Structure | 4 |
| DCA6203 | Web Technologies 4 | |
| DCA6204 | Advanced Computer Networks | 4 |
| DCA6205 | Communication Skills 2 | |
| DCA6230 | Advanced Data Structure using C++ - Practical 2 | |
| DCA6231 | Web Technologies – Practical | 2 |
| | II Year Third Semester | |
| DCA7101 | Probability and Statistics | 4 |
| DCA7102 | Programming in Java | 4 |
| DCA7103 | Advanced Software Engineering | 4 |
| DCA7104 | Analysis and Design of Algorithm | 4 |
| | Elective – I | 4 |
| DCA8141 | Wireless and Mobile Communication | |
| DCA8142 | Open Source DB Systems | |
| DCA8143 | Cryptography and Network Security | |
| DCA7130 | Java Programming – Practical | 2 |
| DCA7131 | Seminar | 1 |
| Fourth Semester | | |
| DCA7230 | Project work | 24 |
| | Elective – II | 4 |
| DCA8241 | Advanced Web Programming | |
| DCA8242 | Cloud DB System | |
| DCA8243 | Storage Management | |
| | Total Credits | 93 |

5.2.2 Detailed Syllabus

First Year First Semester

| Course code: DCA6101 | | Course Title: Fundamentals of Computer and IT (Bridge Course) | |
|----------------------|--|---|--|
| Unit 1 | Introduction to Computers: | | |
| | Computer – D Computers, Classification | efinitions, The Evolution of Computers, Characteristics of Organisation of a Computer, Generation of Computer, of Computers, Distributed Computer System, Parallel Computers. | |
| Unit 2 | Computer & I | Mathematics: | |
| | Decimal, Bina | nary, Octal, Hexadecimal Number Systems, Converting Techniques | |
| | in Number Sys | ystems, One's Complements, Two's Complements, Rules and | |
| | Laws of Boole | an Algebra, Basic Gates (NOT, AND & OR). | |

| Unit 3 | Logic Gates: | | |
|-----------|---|--|--|
| | Introduction, Definition of Combinational Circuits & Sequential Circuits, Flip | | |
| | Flops, Shift Registers and their types, Counters, Types of FLIP FLOPS. Central | | |
| | Processing Units: Introduction, CPU Essentials, Architectural Performance, | | |
| | Processors, CPU Overclocking. | | |
| Unit 4 | Computer Memory: | | |
| | Introduction, Memory Systems and Cells, Memory Arrays, RAM, ROM, External | | |
| | Memory (Secondary Memory), Floppy Disk Drives, Compact Disk Read Only | | |
| | Memory, Magnetic Storage Drives, Physical Devices Used to Construct | | |
| | Memories. Components: Connecting the Computer Components, Types of BUS, | | |
| | Industry Standard Architecture (ISA), Peripheral Component Interconnect (PCI), | | |
| | Accelerated Graphics Port (AGP), Front Side Bus (FSB), Dual | | |
| | Dete Sterenes Introduction, Hand Drive, CD DOM Drive, DVD Drive, Dive Drug | | |
| Unit 5 | Disa Drive, Elech Memory Drive, DD-ROW Drive, DVD Drive, Blue-Ray | | |
| Unit 6 | Input & Output Davices: Introduction Input Davices. Output Davices | | |
| | Computer Software: | | |
| Unit 7 | Computer Software: | | |
| | Technology Software Development Software analysis and design Software | | |
| | testing programming methods software applications | | |
| Unit 8 | Operating System: | | |
| onit o | Introduction Operating System Concepts, Functions, Development, | | |
| | Components. Services. | | |
| Unit 9 | Computer Communication: | | |
| | Concept of computer communication, Basic Elements, Data communication, | | |
| | Network Type, OSI Model, Transmission Control Protocol/Internet Protocol | | |
| | Model, Internet. | | |
| Unit 10 | Computer Networks: | | |
| | Introduction, TCP/IP Protocol Suite, History of Internet, Concepts of Internet, | | |
| | How Internet Works, Requirements of Internet, Uses of Internet, Internet | | |
| | Explorer, Internet Applications | | |
| Poforonco | Pooks | | |
| Relefence | DUOV2 | | |
| | | | |

| Course co | de: DCA6102 | Course Title: Programming in C |
|-----------|--|--|
| Unit 1 | Introduction to C Programming: Introduction, Features of C and its Basic Structure, Simple C Programs, Constants, Concept of an Integer and Variable | |
| Unit 2 | Operators and Expressions: Introduction, Arithmetic Operators, Unary, Relational and Logical Operators, Conditional Operator, Bitwise Operators, Increment and Decrement Operators, Size and Precedence of Operator, Precedence of Operators, Library Functions. | |
| Unit 3 | Data Types and Ir Numbers, Type Cast Op | nput/Output Operators: Introduction, Floating-point perator, Type Char, Keywords, Character Input and |

| Output, Formatted Input and Output, gets() and puts() functions, Interactive |
|---|
| |
| Control Statements and Decision Making: Introduction, Goto Statement, If |
| Statement, Conditional Expression, Switch Statement, Types of Loop, Do |
| While, For. |
| Functions: Basic, Prototype, Recursion. |
| Storage Classes: Introduction, Storage Classes and Visibility, Automatic or |
| Local Variables, Global Variables, Static Variables, External Variables. |
| Arrays and Strings: Introduction, One dimension and Multi dimension array, |
| Strings. |
| Pointers: Basic, Pointers and One-dimensional Arrays, Null Pointers, Pointers |
| and Strings, Pointers and Two-dimensional Arrays. |
| Structures and Unions: Introduction, Basics of Structures, Structures and |
| Functions, Arrays of Structures, Pointers to Structures, Self-Referential |
| Structures, Unions. |
| Preprocessor: Introduction, File Inclusion, Macro Definition and Substitution, |
| Conditional Compilation |
| Dynamic Memory Allocation and Linked List: Introduction, Dynamic Memory |
| Allocation, Concept of Linked List. |
| File management: Introduction, Defining and Opening a file, Closing Files, |
| Input/Output Operations on Files, Error Handling During I/O Operations, |
| Random Access to Files. Command Line Arguments. |

- 3. The C Programming Language by Brian Kernighan and Dennis Ritchie 2nd edition

| Course co | de: DCA6103 Course Title: Foundation of Mathematics |
|-----------|--|
| Unit 1 | Sets: Introduction, Sets and their Representations, Empty Set, Finite and Infinite Sets, Equal and Equivalent Sets, Subsets, Power Set, Universal Set, Venn Diagrams, Complement of a Set, Operations on Sets, Cartesian Product of Sets. |
| Unit 2 | Statements: Introduction, Basic Logical Connectives, Conjunction, Disjunction, Negation of Compound Statements, Truth Value and Tables, Tautologies, Logical Equivalence, Applications and Negation. |
| Unit 3 | Number System: Introduction, Concept of Limit, Concept of Continuity. |
| Unit 4 | Differentiation : Differentiation of Powers of x, Differentiation of ex and log x, Differentiation of Trigonometric Functions, Rules for Finding Derivatives, Differentiation by Substitution, Differentiation from First Principles, Successive Differentiation, Leibnitz's Theorem, Cauchy's Theorem, Asymptotes. |
| Unit 5 | Integration: Integration of Standard Functions, Rules of Integration. |
| Unit 6 | Reduction Formula: Trigonometric Functions, Definition of improper Integrals, Beta-Gamma Functions. |
| Unit 7 | Partial Derivative: Introduction, Chain Rule, Differentiation of Implicit Functions, Exact Differential, Extreme Values, Methods of Lagrange Multiplier, Jacobians, Double and Triple Integrals. |

| Unit 8 | Scalar & Vector: Definition, Representation of Vector, Addition and Subtraction |
|--------|---|
| | of Vector, Components, Multiplication of Vector, Scalar Triple Product, Vector |
| | Triple Product, Differentiation of Vector Function, Integration of Vector Function, |
| | Scalar and Vector Field, Gradient of Scalar Field, Arc Length, Divergence and |
| | Curl of Vector Field, Line Integral, Surface Integral, Volume Integral, Green's |
| | Theorem, Divergence Theorem, Stroke's Theorem. |

| Unit 9 | Matrix: Introduction, Definition, Operations, Square Matrix and Its Inverse, Determinants, Properties of Determinants, Inverse of a Matrix, Elementary Row and Column Transformation, Consistency of System of linear Equations, Techniques of Solution to Equations. |
|---------|--|
| Unit 10 | Complex Numbers: Introduction, Conjugate of a Complex Number, Modulus of a Complex Number, Geometrical Representation of Complex Number, Exponential Form of a Complex Number, n th Roots of a Complex Number, Limits, Continuity, Differentiability, Cauchy Riemann Equation. |

| Course code: DCA6104 | | Course Title: Advanced Database Management System |
|----------------------|---|--|
| | | |
| Unit 1 | Comparison be Databases, Appli client/server da application, Differ of users, Based c purpose, Compar | tween Different Databases: Introduction, Significance of cations of Database System, Personal databases, Two-Tier tabases, Multi-tier client/server databases, Enterprise ent Types of DBMS, Based on data model, Based on number on number of sites, Based on cost, Based on ison between Centralised and Distributed Database. |
| Unit 2 | RDBMS and SQ Constraints, Ent Definition Statem Destroying and statement, Subq Updating the da Processing, Dyna Denormalisation. | L: Introduction, Relational Query Languages, SQL, Integrity ty integrity, Domain integrity, Referential integrity, Data ents, Creating relations in SQL, Adding and deleting tuples, altering relations, Data Manipulation Language, SELECT uery, Querying multiple relations, Functions, GROUP BY, tabase, Views, Embedding SQL Statements, Transaction mic SQL, Normalisation and Database Design, |
| Unit 3 | Query Optimisa sorting, Impleme operation, Project implementation, H query graphs, Ge Conversion of qu Optimisation, Mu Execution Strate Updates. | ation: Introduction, Query Execution Algorithm, External nting the SELECT operation, Methods to implement JOIN t and Set operations implementation, Aggregate operations Heuristics in Query Optimisation, Notation for query trees and neral transformation rules for relational algebraic operations, iery trees into the query execution plans, Semantic Query ti-Query Optimisation and Application, gies for SQL Sub Queries, Query Processing for SQL |
| Unit 4 | Query Executi | on: Introduction, Introduction to Physical-Query-Plan |
| | Operators, Scar Algorithms for Da loop join, Iterato based on Sorting Algorithms, Buffe Using Heuristics Executing Query | ining tables, Sorting while scanning tables, One-Pass tabase Operations, Nested-Loop Joins, Tuple-based nested- r for a tuple-based nested-loop join, Two-Pass Algorithms g, Two-Pass Algorithms Based on Hashing, Index- Based r Management, Parallel Algorithms for Relational Operations, n Query Optimisation, Basic Algorithm for Operations. |
| Unit 5 | Adaptive Query | Processing and Query Evaluation: Introduction, Query |

| - | |
|---------|--|
| | Processing Mechanism: Eddy, Eddy Architecture and how Eddy allows Extreme flexibility, Properties of Query Processing Algorithms, Need and Uses of Adaptive Query Processing, Complexities, Robust Query Optimisation through Progressive Optimisation, Query Evaluation Techniques for Large Databases, Query Evaluation Plans. |
| Unit 6 | Transaction Processing: Introduction, Transaction Processing: An Introduction, Advantages and Disadvantages of Transaction Processing System, Advantages of transaction processing system, Disadvantages of transaction processing system, Serialisability and Recoverability, Cascading rollback, Recoverable schedules, Managing rollbacks using locking, View Serialisability, Resolving Deadlocks, Deadlock detection by timeout, The waits-for graph, Distributed Locking, Centralised lock systems, Primary-copy locking, Transaction Management in Multi-Database System, Long-Duration Transactions, High Performance Transaction Systems. |
| Unit 7 | Concurrency Control: Introduction, Enforcing Serialisability by Locks, Locks, Locking scheduler, Two phase locking, Locking Systems with Several Lock Modes, Architecture for a Locking Scheduler, Two-part scheduler, The lock table, Managing Hierarchies of Database Elements, Concurrency Control by Timestamps, Timestamp resolution, Timestamp locking, Concurrency Control by Validation, Database Recovery Management. |
| Unit 8 | Parallel Database Architectures for Parallel Databases: Introduction, Parallel Database, Advantages of parallel database, Disadvantages of parallel database, Parallelism in Database Management System, Parallel Query Evaluation, Parallel query processing, When to implement parallelism, How parallel-execution works, Parallelised SQL statements, Parallelising Individual Operations, I/O Parallelism, Partitioning techniques (number of disks = n), Comparison of partitioning techniques, Inter-Query Parallelism, Intra Query Parallelism, Intra partition parallelism, Inter partition parallelism, Inter Operation and Intra Operation Parallelism, Design of Parallel Systems. |
| Unit 9 | Object Oriented DBMS: Introduction, Object Oriented Paradigm, OODBMS Architectural Approaches, Distributed client - server approach, Data access mechanism, Object clustering, Heterogeneous operation, Object Identity, Procedures and Encapsulation, Object Oriented Data Model, Relationships, Identifiers, Basic OODMS Terminology, Basic Interface and Class Structure, Type Hierarchies and Inheritance, Type Extents and Persistent Programming Languages. |
| Unit 10 | Distributed Databases : Introduction, Introduction of Distributed Databases, DDBMS architectures, Functions of distributed database management system, Components of distributed database management system, Homogeneous and Heterogeneous Database, Distributed Data Storage, Data fragmentation, Data replication, Advantages and Disadvantages of Data Distribution, Advantages of data distribution, Disadvantages of data distribution, Distributed Transaction, Commit Protocols, Components of atomic commit, Two phase commit, Concurrency Control, Recovery of Distributed Database, Directory Systems, DDBMS Transparency Features, Distribution Transparency. |
| Unit 11 | Object Relational and Extended Relational Databases : Introduction, Object Relational Database, Reasons behind the development of ORDBMS, Advantages of ORDBMS, Disadvantages of ORDBMS, Characteristics of object relational databases, Extension Techniques in RDBMS, Standards for OODBMS Products and Applications, ODMG-93 standards, ODMG Smalltalk binding, SQL3, Nested Relations and Collections, Storage and Access |

| | Methods, Implementation Issues for Extended Type, Comparing RDBMS, | |
|---------|---|--|
| | OODBMS and ORDBMS. | |
| Unit 12 | XML Query Processing : Introduction, XML Query Languages, XML-QL, Lorel, Quilt, XQL, XQuery, Approaches for XML Query Languages, Query | |
| | processing for relational structure, Query processing on storage schema, | |
| | XML Database Management Systems. | |
| Unit 13 | Database Application : Introduction, Active Database, Design principles for active rules, Starburst, Oracle, DB2, Application of active database (Active DB), Temporal Database, Multimedia Database, Video Database Management, Storage management for video, Video pre-processing for content representation and indexing, Image and semantic-based query processing, Real-time buffer management. | |

| Course co | de: DCA6105 | Course Title: Computer Architecture |
|-----------|---|--|
| | | |
| Unit 1 | Fundamentals of Computer Architecture: Computational Model, Evolution of Computer Architecture, Process and Thread, Concepts of Concurrent and Parallel Execution, Classification of Parallel Processing, Parallelism and Types of Parallelism, Levels of Parallelism. | |
| Unit 2 | Fundamentals of Computer Design: Changing Face of Computing, Computer Designer, Technology Trends, Quantitative Principles in Computer Design, Power Consumption. | |
| Unit 3 | Addressing, Address Mo sets, Instructions for Co | Ies: Classifying instruction set architecture, Memory odes for Signal Processing, Operations in the instruction ntrol Flow, MIPS Architecture. |
| Unit 4 | Pipelined Processor: F Hazards, Control Haz Improvement Pipeline, E | Pipelining, Types of Pipelining, Pipelining Hazards, Data ards, Techniques to Handle Hazards, Performance Effects of Hazards on Performance. |
| Unit 5 | Design Space of Pipel Processing, Pipelined E Processing of Loads and | ines: Design Space of Pipelines, Pipeline Instruction xecution of Integer and Boolean Instructions, Pipelined d Stores. |
| Unit 6 | Instruction-Level Para Overcoming Data Hazar Approach, High perform | allelism and its Exploitation: Dynamic Scheduling, rds, Dynamic Scheduling Algorithm – The Tomasulo ance Instruction Delivery, Hardware-based Speculation. |
| Unit 7 | Exploiting Instruction Branches, Branch Han Prediction, The Intel IA- Embedded and Mobile N | – Level Parallelism with Software Approach: Types of dling, Delayed Branching, Branch Processing, Branch 64 Architecture and Itanium Processor, ILP in the Markets. |
| Unit 8 | Memory Hierarchy Tec Mapping, Elements of organization, Interleave Tolerance, Consistency | hnology: Memory Hierarchy, Cache Addressing Modes, Cache Design, Cache Performance, Shared Memory d Memory Organisation, Bandwidth and Fault Models. |
| Unit 9 | Vector Processors: Us Vector Processing, Vector | e and Effectiveness of Vector Processors, Types of tor Length and Stride Issues, Compiler Effectiveness in |

| | Vector Processors. | | |
|---------|---|--|--|
| Unit 10 | SIMD Architecture: Parallel Processing: An Introduction, Classification of | | |
| | Parallel Processing, Fine-Grained SIMD Architecture, Coarse-Grained SIMD | | |
| | Architecture. | | |
| Unit 11 | Vector Architecture and MIMD Architecture: Vectorisation, Pipelining, MIMD | | |
| | Architectural Concepts, Problems of Scalable Computers, Main Design Issues | | |
| | of Scalable MIMD Architecture. | | |
| Unit 12 | Storage Systems: Introduction, Types of Storage Devices, Connecting I/O | | |
| | devices to CPU/Memory, Reliability, Availability and Dependability of Storage | | |
| | System, RAID, I/O Performance Measures. | | |
| Unit 13 | Scalable, Multithreaded And Data Flow Architecture: Multithreading, | | |
| | Principles of Multithreading, Scalable and Multithreaded Architecture, | | |
| | Computational Models, Von Neumann- based Multithreaded Architectures, | | |
| | Dataflow architecture, Hybrid Multithreaded Architecture. | | |
| Unit 14 | Case Study: Basic Features Of Current Architectural Trends, DSP Processor, | | |
| | Dual Core Technology, Case Study 1: Architecture Of Pentium Microprocessors, | | |
| | Case Study 2: Choosing A DSP Processor, Case Study 3: | | |
| | Tenasys Intime* RTOs Intel® Coretm Duo Processor. | | |

| Course co | ode: DCA6202 | Course Title: Advanced Data Structure | |
|-----------|--|---|--|
| | | | |
| Unit 1 | Data Structures Basics | s: Structure and Problem Solving, Data Structures, Data | |
| | Structure Operations, Al | gorithm: Complexity and Time-Space Tradeoff. | |
| Unit 2 | Algorithm Complexity: Mathematical Notation and Functions, Algorithm | | |
| | Notation, Control Structu | ures, Complexity of Algorithm, Rate of Growth. | |
| Unit 3 | Linked List: Linked List and its representation in memory, Traversing a Linked | | |
| | List, Searching a Linked | List, Memory Allocation and Garbage Collection, | |
| | Insertion into Linked list, | , Deletion from a Linked list, Types of Linked List. | |
| Unit 4 | Stacks and Queues: Stack, Applications of Stack, Queue. Trees and Binary | | |
| | Trees: Definition and Co | oncepts, Binary Tree: Definition and Concepts, Types of | |
| | Binary Tree, Traversal o | on Binary Tree, Representation of Binary Tree. | |
| Unit 5 | Binary Search Tree: Co | onversion of General Tree to Binary Tree, Sequential | |
| | and Other Representation | ons of Binary Tree, Concept of Binary Search Tree | |
| | (BST), Operations on B | ST. | |
| Unit 6 | Balanced Trees: Defini | tion and Structure of AVL Tree, Operations on AVL | |
| | Tree, Definition and Stru | ucture of B-Tree, Operations on B-Tree, Applications of | |
| | B-Tree. | | |

| Unit 7 | Graphs: Basic Concepts about Graphs, Matrix Representation of Graphs, List | |
|---------|--|--|
| | Structures, Other Representations of Graphs, Algorithms for Graph Traversal, | |
| | Spanning Trees. | |
| Unit 8 | Applications of Graphs: Topological Sorting, Weighted Shortest Path - | |
| | Dijkstra's Algorithm, Minimum Spanning Tree (MST), Introduction to NP- | |
| | Completeness. | |
| Unit 9 | Dynamic Storage Management: Introduction, Memory Management, First-fit | |
| | Storage Allocation, Storage Release, Buddy Systems, Garbage Collection. | |
| Unit 10 | Searching and Sorting Techniques: Sequential Searching, Binary Searching, | |
| | Bubble sort, Merge sort, Selection sort, Heap sort. | |
| Unit 11 | File Structures: External Storage Devices, Introduction to File Organization, | |
| | Sequential Files, Indexed Sequential Files, Direct Files. | |
| Unit 12 | External Sorting Techniques: External Sorting, Sorting on Disks, Generating | |
| | Extended Initial Runs. External Searching Techniques: External Searching, | |
| | Introduction to Static Hashing, Organizing direct files with hashing, Collision | |
| | Resolution Methods, Dynamic Hashing Techniques. | |

| Course code: DCA6203 | | Course Title: Web Technologies |
|---|---|---|
| | 1 | |
| Unit 1 | Web Basics: Internet a | and World Wide Web, URL, web browsers, web |
| | servers, and Basic pro | tocols of Internet. |
| Unit 2 HTML: Structure of HTML document, Text basics, rules, I | | HTML document, Text basics, rules, Images and |
| | multimedia, document | layout, links and webs, formatted lists, cascading style |
| | sheets (CSS), forms, ta | ables, frames and executable content. Dynamic HTML: |
| | Introduction of DHTMI | ., CSS of DHTML, Event handling, and data binding. |
| | XML Introduction: Ana | tomy of an XML document, XML declaration, element |
| | tags, element markup, attribute markup elements and attributes, develop | |
| | advanced DTDs. | |
| Unit 3 XML Programming: XML objects, checking validity, creating XI | | XML objects, checking validity, creating XML links, |
| | advanced addressing, | viewing XML in browsers, processing, event-driven |
| | programming, XML pro | gramming and scripting. XML Presentation Technology: |
| | XML with existing style | sheet technologies, creating XML schema choices and |
| | creating elements and | d types in XML. XML Processors: DOM and SAX, |
| | Introduction to Java Sc | ript, Object in Java Script, and Dynamic H I ML with Java |
| | Script. XIVIL Http Requ | est: the XIVIL Http Request Object, events for the XIVIL |
| | Hitp Request Object, a | ind exceptions for the XIVIL |
| | | VIAX components and handling dynamic LITML with |
| Unit 4 | A JAX Introduction: / | AJAA components and nandling dynamic HTML with |
| | Http Doquest Access | ng creating and Modifuing XML Nodes Loading XML |
| | Data into an HTML Data | ng, creating and mounying AML Nodes, coading AML |
| | XML. | |

| Unit 5 | PHP Introduction: PHP, Anatomy of a PHP document, AJAX with PHP – | |
|---|---|--|
| | Sending data to PHP with Ajax, PHP code and the complete AJAX example. | |
| | AJAX with Databases: AJAX with databases, pulling data from a database. | |
| Unit 6 | Active Server Page: Scripting objects, ASP components, Data store Access, | |
| | using Record sets and building Script components for ASP. | |
| Reference Books | | |

| Course code: DCA6204 | | Course Title: Advanced Computer Networks |
|----------------------|---|---|
| | r | |
| Unit 1 | Introduction, Protocols and Standards: Introduction, Computer Networks, Types of topology, Categories of network, Network Models, OSI model, Internet model, Comparison of the OSI & the TCP/IP reference models, Addressing, Network Hardware Components. | |
| Unit 2 | Multiplexing and Loca division multiplexing, multiplexing, LAN Techn interface (FDDI), Swit switching. | Al Area Network: Introduction, Multiplexing, Frequency Wave length division multiplexing, Time division hologies, Ethernet, Token Ring, Fiber distributed data ching, Circuit switching, Packet switching, Message |
| Unit 3 | Optical Networking: SONET/SDH hierarchy, structure, SONET/SDH (DWDM). | Introduction, SONET/SDH Standards, T1/E1, SONET STS-1 frame structure, SONET STS-3 frame devices, Dense Wavelength Division Multiplexing |
| Unit 4 | Integrated Service Dig Integrated Service Digi devices, Standard chan ISDN, B-ISDN services. | gital Network: Introduction, Analog Vs. Digital Network, tal Network (ISDN), Goal and structure of ISDN, ISDN nel types and interfaces, ISDN standards, Broadband |
| Unit 5 | Asynchronous Transf Logical Connection, Lo signaling, ATM Cells, C Service Categories, Re Layer (AAL), AAL proto- characterization, Conge | Ter Mode : Introduction, ATM Protocol Architecture and ogical connection, Virtual channel connection, Control Generic flow control (GFC), Header error control, ATM al time services, Non-Real time services, ATM Adaption cols, Congestion Control in ATM Networks, Traffic estion control. |
| Unit 6 | Packet Switching Prot of X.25 networks, Addre networks, Frame Relay Transfer, Call Control. | ocols : Introduction, X.25 Networks, Structure and goals essing in X.25 networks, Protocol stack of X.25 Networks, Frame Relay Architecture, User Data |
| Unit 7 | Internet protocols: Intr Protocol, User Datagrar Text Transfer Protocol. | oduction, Internet Protocol (IP), Transmission Control n Protocol, Internet Control Message Protocol, Hyper |
| Unit 8 | Routing in Internet: Routing, Distance vector (BGP), BGP Routing, B (IDRP), Multicast Routin (DVMRP), Multicast Op | Introduction, Unicast Routing Protocols, Intra-Domain or routing, Link state routing, Broader Gateway protocol GP message types, Inter-Domain Routing Protocol ng Protocols, Distance Vector Multicast Routing Protocol en Shortest Path First Protocol (MOSPF). |
| Unit 9 | Network Management management problems Network Management F | : Introduction, Network Management System, Network s, Network management system architecture, Simple Protocol (SNMP), SNMP Message Format. |

| Unit 10 | Network Security: Introduction, Basics of Cryptography, Symmetric Key |
|----------------|---|
| | Encryption, Data encryption standard (DES), Double DES, Triple DES, Public |
| | Key Encryption, RSA algorithm, Digital Signatures. |
| Unit 11 | Web Security and Traffic Management Basics: Introduction, Web Security |
| | Requirements, Secure Socket Layer (SSL), SSL architecture, SSL protocol, |
| | Traffic Management, Quality Characteristics for Network, Network |
| | characteristics and requirements. |
| Unit 12 | Quality of Service and Queue Analysis: Introduction, Applications and Quality |
| | of Service, Overview of probability and stochastic processes, Queue Analysis, |
| | Queuing model, M/M/1 model, Basic queuing relationship, Queue Management |
| | Algorithms, FIFO algorithm, Priority queuing, Weighted queuing, Hybrid algorithm |
| | of queuing, Feedback. |
| Unit 13 | Multimedia Over Internet: Introduction, Quality of Service Aspects of |
| | Multitasking, Group membership protocol, Multicast backbone (MBone), |
| | Categories of multicast applications, multicast Transport Protocol, multicast |
| | addressing, MTP packet format, MTP's QoS, Resource Reservation Protocol |
| | (RSVP), RSVP traffic types, RSVP operation, RSVP messages, Real-Time |
| | Enterprise Network Security Introduction Demiliterized Zene (DMZ) |
| Unit 14 | Network Address translation Destination network address translation (DNAT) |
| | Socure notwork address translation, Destination network address translation (DNAT), |
| | Secure network address translation (SINAT), Fort Forwarding, Filtering, Facket |
| Poforonco | Books |

| Course co | de: DCA6205 | Course Title: Communication Skills |
|-----------|--|---|
| Unit 1 | Language and Communication: Concept of Communication, Process of | |
| | Communication, Barrier | s of Effective Communication, Types of Communication. |
| Unit 2 | Oral Communication: Advantages and Disadvantages of Oral Communication, | |
| | One-to-One Oral Communication. | |
| Unit 3 | Listening Skills: Meaning of Listening, Types of Listening, Barriers to Effective | |
| | Listening, Strategies for | Effective Listening, Semantic Markers. |
| Unit 4 | Reading Skills: Definition and Meaning of Reading, Purpose of Reading, | |
| | Types of Reading, SQ3 | R Technique of Reading. |
| Unit 5 | Writing Skills: Paragra | ph, Static Description, Process Description, Describing |
| | Facts and Figures. | |
| Unit 6 | Business Writing: Bus | iness Letter Writing, Types of Business Letter, Job |
| | Application, Other Business Communication. | |
| Unit 7 | Organisational Docum | ents: Memo, Circulars and Notices. |

Second Year Third Semester

| Course co | de: DCA7101 | Course Title: Probability and Statistics |
|-----------|---|--|
| | | |
| Unit 1 | Probability : Introduction, Features of Random Experiment, Definitions: Sample Space, Event, Mutually Exclusive Events, Kolmogorov's axioms of Probability, Exhaustive Event, Independent Event, Mutually and Pair wise independent Event, Additional theorems of Probability, Multiplication theorem of Probability for independent events. Conditional Probability, Baye's Theorem | |
| Unit 2 | Random Variables: Int and Continuous random discrete random variable Two-dimensional randor variables, Joint Density | roduction, One-dimensional Random Variable, Discrete variables, Distribution Function, Distribution Function of es, Distribution Function of continuous random variables, m variables, Discrete and Continuous random Function, Marginal and Condition probability distribution. |
| Unit 3 | Mathematical Expectat dimensional random var random variable, Proper Covariance, Conditional | tion: Introduction, Mathematical expectation of one iable, Mathematical expectation of two dimensional ties of Expectation (Mean) of single variable, Variance, Expectation and Conditional Variance. |
| Unit 4 | Moment generating fun function, Properties of M Cumulants, Characterist | nction: Introduction, Moments from Moment generating Ioment generating function, Cumulants, Properties of tic function, Properties of Characteristic function. |
| Unit 5 | Measures of Central Te Types of Averages, Mat Harmonic Mean, Positio Percentile. | endency: Introduction, Requisites of a Good Average, hematical Average, Arithmetic Mean, Geometric Mean, nal Average, Median, Mode, Quartiles, Deciles, |
| Unit 6 | Measure of Dispersion Dispersion, Types of M Quartile Deviation, Mean | : Introduction, Requisites of Ideal Measure of easures of Dispersion, Absolute Measure of Variation, n Deviation, Standard Deviation, Coefficient of variation. |
| Unit 7 | Moments: Raw and c moments & central mom Pearsonian coefficients | entral moments. Relation between moments : raw nents, Effect of change of origin and scale on moments, Measures of skewness, kurtosis |

Unit 8 Distribution: Introduction, Bernoulli Trials, Binomial Distribution, Poisson

| | Distribution, Continuous Distribution. | | |
|---------|---|--|--|
| Unit 9 | Correlation and Regression : Introduction, Correlation, Types of correlation, Methods of measurement of correlation, Partial Correlation, Multiple Correlation, Regression, Regression Analysis, Regression Lines, Regression coefficient, Angle between two regression lines, Multiple Regression. | | |
| Unit 10 | Index Number: Introduction, Problems in the construction of Index number, | | |
| | Types of Index Number, Different methods of computing an Index number, Simple Aggregate method, Simple Relative method, Weighted relative method, Weighted aggregate Index numbers, Test of Good Index Number. | | |
| Unit 11 | Time Series: Introduction, Role of Time series Analysis, Components of Time | | |
| | Series, Measurement of Trends, Measurement of Seasonal Variations, | | |
| | Measurement of Cyclical Variations, Measurement of irregular variations. | | |
| Unit 12 | Sampling Theory : Introduction, Population and Sample, Universe or Population, Types of Population, Sample, Advantages of Sampling, Sampling Theory, Law of Statistical Regularity, Principle of Inertia of Large Numbers, Principle of Persistence of Small Numbers, Principle of Validity, Principle of Optimisation, Terms Used in Sampling Theory, Errors in Statistics, Measures of Statistical Errors, Types of Sampling, Probability Sampling, Non-Probability Sampling, Determination of Sample Size, Central Limit Theorem. | | |
| Unit 13 | Hypothesis Testing: Introduction, Testing Hypothesis, Null and Alternate Hypothesis, Interpreting the Level of Significance, Hypotheses are accepted and not proved, Selecting a significance level, One–Tailed and Two–Tailed Tests, Tests of Hypothesis Concerning Large Samples, Testing Hypothesis about population Mean, Testing Hypothesis for the Difference Between Two Means, Test of Hypothesis Concerning Attributes, Testing Hypothesis about a population Proportion, Testing Hypothesis about Difference Between Two Proportions. | | |
| Unit 14 | Tests of Significance Based on t, F and Z Distribution: Introduction, t- test | | |
| | Distribution, Properties of student's t- distribution, Applications of t- distribution, | | |
| | F – Test Distribution. Z- Test Distribution. | | |

| Course co | de: DCA7102 | Course Title: Programming in Java |
|-----------|--|---|
| Unit 1 | Introduction to Java: I Virtual Machine (JVM), Kit (JDK), Security in Ja | L ntroduction, History of Java, Features of Java, Java Java Runtime Environment (JRE), Java Development ava. |
| Unit 2 | Java Basics: Introduction, Keywords, Working of Java Including Comments, Data Types in Java, Primitives Data Types, Abstract/Derived Data Types, Variables in Java, Using Classes in Java, Declaring Methods in Java, Code to Display Test Value, The main() Method, Invoking a Method in Java, Java Generics, Generic Methods, Generic Classes, Saving, Compiling and Executing a Java Program's Saving. | |
| Unit 3 | Operators and Contro Operators, Increment a | I Statements: Introduction, Operators, Arithmetic nd Decrement Operators, Comparison Operators, |

| | Logical Operators, Operator Precedence, Control Flow Statements, If-else | | | |
|--|---|--|--|--|
| | Statement, Switch Statement, For Loop, While Loop, Do-While Loop, Break Statement, Continue Statement. | | | |
| Unit 4 | Arrays and Strings: Introduction, String Handling, Special String Operations, | | | |
| 0 | Character Extraction, String Comparison, Searching Strings, String Modification | | | |
| | StringBuffer. | | | |
| Unit 5 | Inheritance, Package and Interface: Introduction, Inheritance, Types of | | | |
| | Relationships, What is Inheritance, Why Generalize? Implementing Inheritance | | | |
| | in Java, Access Specifiers, The Abstract Class, Packages, Defining a Package, | | | |
| | Understanding CLASSPATH, Interface, Defining an Interface, Some Uses of | | | |
| | Classes, Non Static Nested Class or Inner Class, Static Class | | | |
| Unit 6 | Exception Handling : Introduction. Definition of an Exception. Exception | | | |
| | Classes, Common Exceptions, Exception Handling Techniques. | | | |
| Unit 7 | Streams in Java: Introduction, Streams Basics, The Abstract Streams, Stream | | | |
| | Classes, Readers and Writers, Random Access Files, Serialization, Stream API. | | | |
| linit 0 | Event Hendling, Introduction, Components of an Event Event Classes, Event | | | |
| Unit o | Listopor Event Handling Adaptor Classes Inpor Classes Aponymous | | | |
| | Classes. | | | |
| Unit 9 | Other Features in Java: Introduction, Assertion, Variable Argument (Varargs), | | | |
| Java Static Import, Autoboxing and Unboxing, Java Enum, Java Annotation, | | | | |
| | Java Custom Annotation. | | | |
| Unit 10 | Java Swing and JavaFX: Introduction, Java Foundation Classes, Java Swing | | | |
| | Architecture Layout Pane | | | |
| Unit 11 | Java Database Connectivity (JDBC): Introduction Java Data Base | | | |
| 0 | Connectivity. Database Management. Mechanism for connecting to a backend | | | |
| | database (ODBC), Loading the ODBC driver. | | | |
| Unit 12 | RMI, CORBA and Java Beans: Introduction, Remote Method Invocation (RMI), | | | |
| | RMI Terminology, Common Object Request Broker Architecture (CORBA), | | | |
| | Java Beans, The BeanBox, Running the BeanBox. | | | |
| Unit 13 | Java Server Pages and Serviets: Introduction, Java Server Pages (JSP), How | | | |
| | Architecture Servlet Life Cycle. | | | |
| Unit 14 | Networking in Java: Introduction, Networking in Java, URL Objects. | | | |
| Reference | Books | | | |
| 1. Ecke | el, Bruce. Thinking in JAVA. Prentice Hall Professional. | | | |
| 2. Hors | stmann, Cay S., and Gary Cornell. Core Java 2: Volume I, Fundamentals. Pearson | | | |

4. Hall, Marty. More servlets and JavaServer pages. Prentice Hall PTR.

| Course co | de: DCA7103 | Course Title: Advanced Software Engineering |
|-----------|---|---|
| | | |
| Unit 1 | Introduction: Principles, characteristics and applications. | |
| Unit 2 | Software Process and | Life Cycle Models: Software process, project and |
| | product, process assess | sment, software process capability maturity waterfall |

| | model, incremental model, spiral model, prototyping model, object-oriented model, agile model. Software Requirements: functional requirements, non- functional requirements, user requirements and system requirements. Software Requirement Engineering Process: feasibility study of software requirements, requirements elicitation, requirements analysis and requirements validation. Software Reliability: Software reliability metrics, programming for reliability and software reuse. |
|--------|--|
| Unit 3 | Software Design: Basics of software design, data design, architectural design, component level design, user interface design and Object Oriented Design. Module, modularization and design techniques. |
| Unit 4 | Software Implementation: Structured coding techniques, coding styles, coding methodology, code verification techniques, coding tools, code documentation, coding standards and guidelines. Software re-engineering, Change management configuration management, maintenance tools and techniques. |
| Unit 5 | Software Testing Strategies: Black-box and white box testing, validation and debugging. Software quality assurance, software reviews, formal technical reviews and the ISO 9000 quality standards. |
| Unit 6 | Software Project Management: Project planning, project scheduling, project staffing and people capability maturity model. |

 Sommerville, "Software Engineering", Addison Wesley.
 A. P. Mathur, "Fundamentals of Software Testing", Pearson Education.

| Course co | de: DCA7104 Course Title: Analysis and Design of Algorithm | |
|-----------|---|--|
| Unit 1 | Introduction to Algorithm: Concept of Algorithm, Role of Algorithm in Computing, Types of Algorithm, Fundamental Data Structures. Analysis of Algorithm Efficiency: Complexity of algorithm, Methodologies for Analyzing Algorithms, Pseudocode. | |
| Unit 2 | Mathematical Aspects and Analysis of Algorithms: Asymptotic Notations, Recursion, Analysis of Non-Recursive/Recursive Algorithms. Empirical Analysis of Algorithms | |
| Unit 3 | Brute Force Method: Brute force algorithm, Selection Sort and Bubble Sort, Sequential Search and Brute Force String Matching, Exhaustive Search. | |
| Unit 4 | Divide and Conquer: Merge sort, Quick sort, Binary Search, Binary Tree Traversals and Related Properties. Decrease and Conquer: Concepts of Decrease and Conquer, Insertion Sort, Depth-First search, Depth-First search, Breadth-First Search, Topological Sorting. Transform and Conquer: Presorting, Gaussian Elimination, Balanced Search Trees, Balanced Search Trees, Heaps and Heap sort. Space and Time Tradeoffs: Sorting, Horspool's algorithm, Boyer- Mo Dynamic Programming ore algorithm, Hash function, B-Tree technique. | |
| Unit 5 | Dynamic Programming: Dynamic programming Vs divide and conquer, Fibonacci Numbers, Binomial Coefficient, Warshall's and Floyd's Algorithms, Optimal Binary Search Trees, Knapsack Problem. | |
| Unit 6 | Greedy Technique: Introduction to Greedy Technique, Prim's Algorithm, Kruskal's Algorithm, Dijkstra's Algorithm, Huffman Trees. Limitations of Algorithm Power: Decision Trees, P, NP and NP – Complete Problems, Cook's theorem. Coping with the Limitations of Algorithm Power: Backtracking, Branch and Bound, Approximation Algorithms for NP-Hard Problems. | |

|----------------------|--|--|--|
| Course code: DCA8141 | | Course Title: Wireless and Mobile Communication | |
| | | | |
| Unit 1 | Introduction to mobile communication and computing: Application and | | |
| | significance of mobi Reference Model of co | le communications, Mobile and wireless devices, mmunication. | |
| Unit 2 | Wireless Transmission: Frequencies, types of signals and antennae, signal propagation and multiplexing techniques. Modulation and spread Spectrum technology, cellular systems used for mobile communications. Wireless Medium Access Control: Specialized MAC, medium accessing technique e.g. SDMA_EDMA_TDMA_CDMA | | |
| Unit 3 | Wireless Telecommunication Systems: Architecture of a GSM, GSM – TDMA/ FDMA frame, logical channels in GSM system, GSM protocol layers, mechanism of localization and calling. Handover in GSM system, High Speed Circuit Switched Data and General Packet Radio Service. | | |
| Unit 4 | Universal Mobile Telecommunication System: System architecture, UMTS radio interface and UTRA Network, Wireless LANs: characteristics of wireless LANs, comparison of infrared and radio transmission technologies, Architecture of an infrastructure based IEEE 802.11. Mobile Network Layer: Mobile IP technology, goals, assumptions and requirements of Mobile IP. Dynamic Host Configuration Protocol. | | |
| Unit 5 | Mobile Transport Lay and Mobile TCP. Fast methods of improving the Transaction oriented T networks. Data Process execution models for m | er: Traditional TCP protocol, Indirect TCP, Snooping TCP retransmit/fast recovery, Transmission/ time-out freezing, he TCP for wireless domain, Selective retransmission and CP, TCP Over 2.5/3G wireless using and Mobility: effect of mobility of the mobile nodes, mobile database system. | |
| Unit 6 | Mobile Ad hoc Netwo | rks: Properties and applications of a MANET, routing | |
| | algorithms used in MANETs, security aspects in MANETs. 4G Technology: WiMAX, and HSPA, HTML5 on Mobile Devices | | |
| Reference | Reference Books | | |

| Course code: DCA8142 | | Course Title: Open Source DB Systems |
|----------------------|--|---|
| Unit 1 | Introduction: Concepts a Algorithms, Transaction i | nd components of a database management system, Join management, Concurrency control and availability |
| Unit 2 | Software Developmen methodologies and deve the forking of software, | t Using Open Source Systems: Tools, components, elopment of applications using the Open Source, analyze drafting of software license |
| Unit 3 | Open Source Licensin Copyright Law, Contrac of OSS licenses, OSS li Warranties. | g: Contract, and Copyright Law -Basic Principles of t and Copyright, Open Source Software Licensing, Types censing strategies, Issues with Copyrights and Patents, |

| Unit 4 | Software Development Using Open Source and Free Software Licenses: |
|--------------|--|
| | Introduction, Models of Open Source and Free Software Development, Forking, |
| | Licenses. |
| Unit 5 | Relational Model, Languages & Systems: Characteristics of relational model, relational algebra, views, constraints and indexes in SQL. |
| Unit 6 | Open-Source Database System: overview of SAPDB, SQLite, Firebird, PostgreSQL, and MySQL. |
| Unit 7 | MySQL: administration, stored procedure, triggers, view, functions and hosting concepts. |
| Unit 8 | PHP Basics: installing, basic scripting, building blocks e.g. variables, data types, constants, operators and PHP structures e.g. data structures and control structures. |
| Unit 9 | PostgreSQL: ORDBMS, Berkeley postgres project, SQL language and the advance features. |
| Unit 10 | Advance Postgres SQL features: Inheritance, Non-atomic values, Arrays, More advance features. |
| Unit 11 | InnoDB data management: join algorithm, transaction management, and concurrency control and data availability in InnoDB. |
| Unit 12 | Berkley DB: Data management, join algorithm, transaction management, concurrency control, availability. |
| Unit 13 | Experimental evaluation: testing environment and the benchmark. |
| Unit 14 | Experimental evaluation using databases: database in main memory, half of |
| | the database in main memory, Database mostly on disk, effects of the size. |

Course Title: Seminar (2 Credits)

Seminar has been introduced to enable the students to carry out a literature survey, and hone their presentation and report preparation skills. Seminar is included to inculcate an active learning platform wherein students can develop the ability to read critically and conceptually, and therefore develop and present a report. Topics chosen for seminar should be related to Computer Applications or Information Technology. The seminar should also help students to speak and write well. Student is required to identify a mentor (faculty) to complete his seminar requirement. As part of the requirement, the student needs to prepare a Report in consultation with the mentor.

Fourth Semester

Course code: DCA7230Course Title: Project workThe project work is part of the MCA program which will give a hands on experience to the
students for developing quality software applications. While working on the project, a student
should involve himself in all the stages of the software development life cycle (SDLC) like
requirements analysis, systems design, software development/coding, testing and
documentation, with an overall emphasis on the development of reliable software systems.
The primary emphasis of the project work is to understand and gain knowledge of the
principles of software engineering practices, and develop good understanding of SDLC.
It is advised that students develop their project for solving problems of software industry or
any research organization. Topics selected should be appropriate enough to justify as an

MCA project.

Electives – II

| Course code: DCA8241 | | Course Title: Advanced Web Programming | |
|----------------------|--------------------------|--|--|
| | | | |
| Unit 1 | HTML Basics: HTML | Introduction, HTML Elements, Attributes, HTML | |
| | Headings, Paragraph | s,HTML Formatting, Fonts, Styles, HTML Links, | |
| | Images, Tables, HTM | L Lists, Forms, Frames, HTML Colors, Colornames, | |
| | Colorvalues, HTML Q | uick List. | |

| | Objects, JSON Syntax, JSON Parsers, JSON Data Transfer Between Client |
| | and Server Autosuggest example |
| Unit 9 | AJAX - XSLT: XSLT, Overview, XSLT in the Browsers, Sarissa, Advantages |
| | and Disadvantages, XPath - Overview, Drag and Drop, Overview, |
| | Scriptaculous, Draggable Options, Droppables, Drag and Drop, Ajax and |
| | Scriptaculous, Apendix, Download / Install Software –Wamp, Regular, |
| | Non-assertions and Quantifiers Assertions and Quantifiers XMI |
| | Basics XMI Benefits XMI Parsers Content Management Web Services |
| | A Document Type Declaration. Elements Attributes. CDATA. Special |
| | Characters |
| Unit 10 | J2ME: Java Environments Comparison, J2ME (Java 2 Micro Edition), J2SE |
| | (Java 2 Standard Edition) & J2EE (Java 2 Enterprise Edition) |
| | J2ME specifics, ME components: KVM, J2ME, CLDC, MIDP - Comparison of |
| | different ME platforms, Profiles - Overview of profile system, Architecture - |
| | How the J2ME works, Differences between J2ME environments - |
| | Comparisons between J2ME and Personal Java, MIDP, Mobile information |
| | device profile, Creating MIDP applications, Midlet suites and deployment, |
| | MIDP GUI, Graphical User Interfaces with MIDP, Displays, Commands, |
| | Pointers, Screens, Animations and drawing, Data structures: Storing data in |
| | Java, Hash table and Hash Map, vector and List, Comparison between |
| | different types, Inner classes, Using Inner classes, Types of Inner classes, |
| | Anonymous, Inner, Member, Static, Exceptions, IO and Networking, Error |
| | nandling, Streamed IO, Socket IO (TCP/IP), J2ME, IO, Connector |
| | Synchronization |
| Unit 11 | Introduction to HTML5: HTML5 - New standard for HTML XHTML and the |
| • | HTML DOM, How Did HTML5 Get Started? Rules for HTML5. New |
| | Features. Some of the most interesting new features in HTML5. Browser |
| | Support, New Elements in HTML5, New Markup Elements, New Media |
| | Elements, The Canvas Element, New Form Elements, New Input Type |
| | Attribute Values, Video on the Web, Video Formats, How It Works, All |
| | <video> Attributes</video> |
| Unit 12 | HTML5 – Audio and Canvas: Audio on the Web, Audio Formats, How It |
| | Works, All <audio> Attributes, HTML5 Canvas, What is Canvas? Create a</audio> |
| | Canvas Element, Draw With JavaScript, Understanding Coordinates, More |
| | Canvas Examples, HTML5 Web Storage, Storing Data on the Client, The |
| | localStorage Object, The sessionStorage Object, HTML5 Input Types, |
| | HIMLS New Input Types, Browser Support, Input Type – email, Input Type – |
| | un, input Type – number, input Type – range, input Type - Date Pickers, |
| Unit 13 | HTML5 Form Elements and Attribute: HTML5 New Form Elements |
| JIILIS | Browser Support details Element keyden Element output Element |
| | HTML5 Form Attributes, HTML5 New Form Attributes, Browser Support |
| | autocomplete Attribute, autofocus Attribute, form Attribute, Form Override |
| | Attributes, height and width Attributes. Attribute min max and step |
| | Attributes, multiple Attribute, no-validate Attribute, pattern Attribute |
| | placeholder Attribute, required Attribute: HTML5 Tag Reference. HTML5 |
| | Global Attributes, HTML5 Event Attributes. Global Event Attributes. |
| | Window Event Attributes, Form Events, Keyboard Events, Mouse Events. |
| | Media Events |

Unit 14 WAP Simulator for Mobile Phones: Introduction, WAP toolkit software includes: WML and WML Script encoders, phone simulators, WML Deck and Card, WML Document Structure, Character data, WML Entities, Prolog, XML Declaration and Character Encoding, Comments in WML, Line Breaking in WML, Paragraphs and Line Breaks, Text Formatting, WML Tables, Wireless Bitmap (WBMP), Links, <anchor> tag, <a> tag

| Course co | de: DCA8242 C | Course Title: Cloud DB System |
|-----------|--|---|
| | | |
| Unit 1 | Introduction to Distribute Cloud – A short history, Peer Computing, Distri Computing, Cloud Comp between Distributed com | ed and Cloud Computing: From collaborative to the Introduction to Client – Server Computing, Peer-to ibuted Computing, Grid Computing, Collaborative puting. Functioning of Cloud Computing, Differences nputing and Cloud computing. |
| Unit 2 | Relational Database M the relational model, R Properties, Overview of Relational DBMS, Inform are Stored | anagement Systems (RDBMS): An informal look a elational Database Management System, RDBMS Relational Query Optimization, System Catalog in a nation Stored in the System Catalog, How Catalogs |
| Unit 3 | Distributed Database Fragmentation, Replicat in Distributing the Data Distribution, Allocatio Design, Design of Distr | e: Distributed Database Concepts, Data tion, Structure of Distributed Database, trade-offs abase, Advantages and Disadvantages of Data on Techniques for Distributed Database ibuted Databases, |
| Unit 4 | Query Processing in Distributed Databases, Distributed Database, D | Distributed Databases: Query Processing in , Overview of Concurrency and Recovery in distributed Databases in Oracle. |
| Unit 5 | Cloud Architectures: Clo cloud computing provide Cloud Services, Industri | bud architectures: SaaS, PaaS, IaaS, SaaS & PaaS ers- Amazon, Google and Microsoft, Cloud Storage, ial Applications. |
| Unit 6 | Distributed file systems Procedure Call (RPC communication. Networ Distributed File System. | s and Cache consistency: Introduction to Remote C) and Remote Method Invocation (RMI) rk File System (NFS), Andrew File System (AFS), Storage in the Cloud: Google file system. |
| Unit 7 | Web Services and Dis WSDL, UDDI, Connectir XML and the Semantic (SOA). | tributed Computing: Introduction to XML, SOAP, ng database to the Web, Web search and retrieval, c Web, concept of Service-Oriented Architecture |

| Unit 8 | Cloud Computing Technology: Clients – Mobile – Thin – Thick, Security - Data Linkage - Offloading Work - Logging - Forensics - Development – Auditing, Network- Basic Public Internet- The Accelerated Internet- Optimized Internet Overlay- Site-to-Site VPN- Cloud Providers- Cloud Consumers - Pipe Size- Redundancy, Services- Identity- Integration- Mapping- Payments- Search. |
|--|--|
| Unit 9 | Accessing the Cloud: Platforms- Web Application Framework- Web Hosting Services- Proprietary Methods, Web Applications- API's in Cloud Computing, Browsers for Cloud Computing- Internet Explorer- Mozilla Firefox- Safari- Chrome. |
| Unit 10 | Information Storage in Cloud Computing: Storage as a Service, Storage Providers- Amazon Simple Storage Service- Nirvanix- Google Bigtable Datastore- MobileMe- Live Mesh, Storage Security, Merits and Demerits of Storage. |
| Unit 11 | Cloud Data Management: Data Security- Data Location- Data Control- Securing data for transport, Scalability and Cloud Services- Large Scale Data Processing- Databases and Data Stores- Data Archival. |
| Unit 12 | Types of Clouds: Introduction to Private Clouds, Hybrid Clouds, Community cloud, Intercloud, Need for Privacy- Defining a private cloud- Public, Private, and Hybrid Clouds – A Comparison, Examining the Economics of the private cloud- Assessing capital expenditures- Vendor Private Cloud Offerings, The Up Key Vendors- Service Oriented- Systems Integrators- Technology Enablers. |
| Unit 13 | Cloud Computing Standards: Best Practices and Standards, Practical Issues- Interoperability- Portability- Integration- Security, Standards Organizations and Groups- Cloud Security Alliance- Distributed Management Task Force (DMTF)- National Institute of Standards and Technology (NIST)- Open Cloud Consortium (OCC)- Open Grid Forum (OGF)- Object Management Group (OMG)- Storage Networking Industry Association (SNIA)- Cloud Computing Interoperability Forum (CCIF)- Vertical Groups. |
| Unit 14 | Cloud Governance: IT Governance, Deciding the Governor, Risk Assessment of running the cloud- Understanding possible risks- Performance monitoring and measurement- Measurement Methods, Working of Governance- Establishment of the Governance Body- IT Service Performance – Monitoring and Measuring- Cataloging control and Compliance Data. |
| Reference 1. R. K.Bu Wiley ar 2. A.Jain, Apress, | Books yya, J. Broberg, A. M. Goscinski, " <i>Cloud Computing: Principles and Paradigms</i> ", nd Sons Publications. Mahajan, " <i>The Cloud-DBA Oracle: Managing Oracle database in the cloud</i> ", (1e). |

| Course code: DCA8243 | | Course Title: Storage Management |
|----------------------|--|---|
| Unit 1 | An overview of Data S I/O Basics, I/O stack, S Protection, Backup and business risks, designin Backups such as Tape backup. | Storage Technology: History of Data Storage, Storage storage technologies such as DAS, NAS and SAN. Data d Restore: data protection and its need, Data loss and ng storage systems for backup and recovery, different e Backup, Disk-to-disk backup and Disk-to-disk to tape |

| Unit 2 | Data Security: Concepts of defence, encryption and attacks, storage system security, DAS and SAN security. Information Life cycle management: Structured and unstructured information, Information context, ILM schema and Regulatory concerns. |
|------------------|--|
| Unit 3 | Storage Networks: Requirements for Network storage, network storage architectures and its functions, design SAN and NAS applications. Devices and Subsystems in Storage Networks: Disk Drives, Tape Drives, Functions of storage Subsystems. Data Redundancy: RAID Fundamentals, Redundant I/O Path Elements, and also Data Redundancy and Mirroring. |
| Unit 4 | File system: File System Structures, File System Constructs, functions, Fundamentals of Network File Systems. Introduction to Storage Virtualization: Files and Records, file attributes, Systematic Organization of Files and File System Strategies. Data on disk: Volume Management, SCSI Protocol and Logical Units. Abstracting Physical Storage: Storage Metadata Integrity, Logical Volume Management, Storage Metadata Servers and Server-Based Storage APIs. Fabric-Based Virtualization: Array-Based Virtualization, Array-Based Data Replication, Array-Based Point-in-Time Copy and Distributed Modular Array Virtualization. |
| Unit 5 | Virtualization Appliances and Services: Black Box Virtualization, In-Band Virtualization Appliances, Out-of-Band Virtualization Appliances, Heterogeneous Mirroring and Heterogeneous Data Replication. |
| Unit 6 | Virtualized SAN File Systems: Conventional File Systems, Distributed File Systems and Virtualizing File Systems, Disk-to-Disk-to-Tape and Virtualizing Tape Systems. |
| Reference | Books |

5.3. Duration of the programme

| Programme | Level | Duration Maximum duration for completion | | Credits |
|-----------|-----------------|--|---|------------|
| MCA | Master's Degree | 2 years | (2+ 2) years (As per UGC Notification on Specification of Degree, 2014) | 93 Credits |

5.4. Faculty and support staff requirement

| | Number available to meet the required |
|-----------------------|---------------------------------------|
| Academic Staff | delivery norms |
| Programme Coordinator | 1 member |
| Course Coordinator | 1 member |
| Course Mentor | 1 member per batch of 250 students |

5.5. Instructional delivery mechanisms

The Directorate of Online Education of MUJ comprises of faculty members and staff who are well versed in Distance Education and Online delivery.

An Academic calendar depicting dates for all major events during each semester will be prepared by faculty members and shared with students through LMS, at the beginning of each academic session.

Apart from providing content in the form of Self Learning Material, enough e-learning resources in the form of Audio and Video content will be provided to students. Regular engagement of students will be ensured through the following means:

- Conduct of Webinars/live lectures/online lectures/Virtual Class
- By encouraging them to participate in mandatory Discussion Forums to stimulate their thinking, and to be able to fearlessly express their views in forums. These discussion forums will be moderated by faculty to provide equal opportunity for everyone to participate, as well as to ensure maintenance of decorum of the forum.
- Through periodic formative assessments

Regular evaluation of content learnt will be provided for, through Self-Assessment Questions within the SLM, as well as quizzes on the LMS. The quizzes can be taken any number of times, so that they reach a stage of being able to answer questions without errors, which is a reflection of their understanding of the concept.

Effort will be made to provide case studies to enhance their analytical ability and make right decisions.

Link to National Portals (SWAYAM/NPTEL) will be provided, as also link to University's digital library portal.

All links to additional reading will be provided in the LMS. Interested students can study beyond the confines of the syllabus.

5.6. Identification of media-print, audio or video, online, computer aided

LMS provides for all audio video content (e-learning material, e-pubs, faculty-led video sessions, virtual classrooms and discussion boards), dashboard of their progress in learning, comparison with their peers in terms of learning, regular notifications regarding upcoming Webinars/virtual classes, Assignments, Discussion Forum participations and Examinations. It also provides an opportunity for raising queries if any, and seek answers to the same, by chat bot or course mentors.

5.7. Student Support Services

The Student Support services will be facilitated by the Directorate of Online Education, Manipal University Jaipur, Rajasthan which includes the pre-admission student support services like counselling about the programme including curriculum design, mode of delivery, fee structure and evaluation methods. Post-admission student support services include guiding students towards accessing e-identity card, LMS portal, Academic calendar and academic delivery. Examinations support staff shall answer queries pertaining to conduct of end-semester examinations, evaluation and issue of certificates.

6. Procedure for Admission, Curriculum Transaction and Evaluation

The purpose of Online education by Manipal University, Jaipur is to provide flexible learning opportunities to students to attain qualification, wherever learners are not able to attend the regular classroom teaching. Academic programmes offered for such candidates under Online Learning mode will be conducted by Directorate of Online Education-Manipal University, Jaipur with support of the various University schools. The programmes/courses may be termed Online mode for award of Degree. Eligibility criteria, programme/course structure, curriculum, evaluation criteria and duration of programme shall be approved by Board of Studies and Academic Council which are based on UGC guidelines.

Candidates seeking admissions in any programme offered by Directorate of Online Education-Manipal University, Jaipur shall fill up online application form available on DOE-MUJ website. Before applying, candidates must check eligibility criteria for programme that they are interested in. Details about Eligibility criteria, programme structure, curriculum, duration, and fee structure are available on the website.

6.1. Procedure for Admission

6.1.1 Minimum Eligibility Criteria for admission

Candidate must have a 10 + 2 + 3 years bachelor degree from recognized University/ Institution or equivalent qualification as recognized by Association of Indian Universities (AIU) or other competent body in Computer Applications/Computer Science/Information Technology with a minimum 50% (45% for Reserved category) marks in aggregate.

Candidates from other streams like Science/Business Administration/ Business management/ Arts & Humanities/Commerce should have completed 10 + 2 + 3 years bachelor degree from recognized University or equivalent qualification as recognized by Association of Indian Universities (AIU) or other competent body with Mathematics at 10+2 level with a minimum 50% (45% for Reserved category) marks aggregate in graduation.

Such candidates need to attend and complete Bridge Course in Fundamentals of Computer and IT along with their Semester 1 courses.

Important Instructions:

- All admissions shall be provisional until and unless candidates meet the eligibility criteria.
- Admission will stand cancelled if a candidate does not meet eligibility criteria, or there is failure to pay programme/course fees.
- Admission will stand cancelled, if candidate does not submit proof of eligibility within stipulated time given by Directorate of Online Education-Manipal University, Jaipur.
- Directorate of Online Education-Manipal University, Jaipur has the right to make necessary changes from time to time as deemed fit in Eligibility criteria, programme/course structure, curriculum, duration, fee structure and programme announcement dates. All changes will be notified on website.

• Candidates should carefully read all instructions given in Programme prospectus before start of application form.

6.1.2. Fee Structure and Financial assistance policy

Suggested Fee for MCA programme is INR 1,50,000/- (One Lakh Fifty Thousand only). Overseas students need to remit equivalent of INR 3.00.000 in USD towards Programme fee A scholarship of upto 25% on tuition fees will be provided to Divyang students and students from Public Sector Undertaking / Defence background.

6.2. Curriculum Transactions

6.2.1. Programme Delivery

Manipal University, Jaipur has state-of-the-art mechanism for online mode of Academic delivery to ensure quality education. Faculty members at MUJ offer expert guidance and support for holistic development of the students. Faculty members are not mere facilitators of knowledge but they also mentor students to make learning more engaging and maintain high retention level. The programme will be delivered with an aim to provide expertise and ensure that students excel in their domains. The features of programme delivery are:

- Online Mode of Academic Delivery
- Periodic review of Curriculum and Study material
- Live Interactive lectures from faculty / Course coordinators
- Continuous Academic and Technical support
- Guidance from Course Co-ordinators
- Learning and delivery support from Course Mentors

6.2.2. Norms for Delivery of Courses in Online Mode

| S. | Credit | No. of | No. of Interactive Sessions | Hours of | Self- | Total |
|-----|--------|--------|-----------------------------|----------------|-------|-------|
| No. | value | Weeks | | Study Material | Study | Hours |

| | of the course | | Synchronou s Online Counselling/ Webinars/ Interactive Live Lectures (1 hour per week) | Discussio n Forum/ asynchron ous Mentoring (2 hours per week) | e- Tutorial in hours | e- Conten t hours | hours includ ing Asses sment etc. | of Study (based on 30 hours per credit) |
|----|------------------|----------|--|---|-------------------------------|-------------------------|--|---|
| 1. | 2 Credits | 6 weeks | 6 hours | 12 hours | 10 | 10 | 22 | 60 |
| 2. | 4 Credits | 12 weeks | 12 hours | 24 hours | 20 | 20 | 44 | 120 |

6.2.3. Learning Management System to support Online mode of Course delivery:

LMS Platform has been built to help learners reach their potential in their chosen programme. It is a secure, reliable learning experience tool that works consistently on Web and Mobile devices. Its simple interface makes it easy for instructors to design courses, create content and grade assignments. It provides a great mobile experience due to the responsive design which is paired with purpose-built native apps. It provides seamless accessibility to ensure all tools are standards-compliant and easy for students to navigate using assistive technologies. It provides 24 X 7 learning experience to facilitate learning as per the pace chosen by learners. Digital portfolio functionality allows students to document and share their learning journey as it happens, on both web and mobile platforms.

6.2.4. Course Design

The Course content is designed as per the SWAYAM guidelines using 4-quadrant approach as detailed below to facilitate seamless delivery and learning experience

(a) Quadrant-I i.e. e-Tutorial, that contains – Faculty led Video and Audio Contents, Simulations, video demonstrations, Virtual Labs

(b) Quadrant-II i.e. e-Content that contains - Portable Document Format or e-Books or Illustration, video demonstrations, documents as required.

(c) Quadrant-III i.e. Discussion forums to raise and clarify doubts on real time basis by the Course Coordinator and his team.

(d) Quadrant-IV i.e. Self-Assessment, that contains MCQs, Problems, Quizzes, Assignments with solutions and Discussion forum topics.

6.2.5. Academic Calendar

| SI No. | Event | Batch | Last Date (Tentative) |
|--------|-----------------|---------|-------------------------|
| 1 | Commencement of | January | 1 st January |
| | semester | July | 1 st July |

| 2 | Enrol student to | January | Within 2 working days of fee | | | |
|---|-------------------------|---------|---|--|--|--|
| | Learning | July | confirmation | | | |
| | Management system | - | | | | |
| 3 | Assignment | January | March end and April end | | | |
| | Submission | July | September end and October end | | | |
| 4 | Submission of | January | 30 th April | | | |
| | Synopsis (Applicable | July | 30 th October | | | |
| | during Pre final | | | | | |
| | semester) | | | | | |
| 5 | Project Report | January | 30 th April | | | |
| | Submission | July | 30 th October | | | |
| | (Applicable during | 2 | | | | |
| | Final semester) | | | | | |
| 6 | Webinars / | | | | | |
| | Interactive Live | January | Mar to May | | | |
| | Lectures and | | | | | |
| | Discussion Forum | Julv | September to November | | | |
| | for query resolution | , | | | | |
| 7 | Admit Card | January | 3 rd week of May | | | |
| | Generation | July | 3 ^{ra} week of Nov | | | |
| 8 | Term End | January | 2 nd week of June (TEE June) | | | |
| | Examination | July | 2 nd Week of December (TEE | | | |
| | | - | December) | | | |
| 9 | Result Declaration of | January | Last week of August | | | |
| | End Term Examination | July | Last week of February | | | |
| | Examination | | | | | |

6.3. Evaluation

The students' learning in a course would be evaluated based on Internal assignments, students' response sheets, and semester end examinations. University adopts rigorous process in development of question papers, question banks, assignments and their moderation, conduct of examinations, evaluation of answer scripts by qualified teachers, and result declaration. The Directorate shall frame the question papers so as to ensure that no part of the syllabus is left out of study by a learner.

The evaluation shall include two types of assessments-continuous or formative assessment in the form of assignments, and summative assessment in the form of end semester examination or term end examination which will be held with technology supported remote proctored examination tool.

However, we shall be considering the guidelines issued by the Regulatory bolides from timeto-time about conduct of examinations.

The examinations shall be conducted to assess the knowledge acquired during the study. There shall be two systems of examinations viz., internal and external examinations. In the case of theory courses, the internal evaluation shall be conducted as Continuous Internal Assessment via Student assignments preparation, quizzes. The internal assessment shall comprise of maximum of 30 marks for each course (One Assignment for a two-credit paper and two assignments for a four-credit paper). The end semester examination shall be of three hours duration for each course at the end of each semester.

6.3.1. Question Paper Pattern

Time: 3 Hours Max. Marks: 70

Part A - (Multiple Choice Questions) - 10 x 2 Marks = 20 Marks

Part B - (Short Answers) - Answer any 4 (out of 6) 4 x 5 Marks = 20 Marks

Part C – (Long Answers) – Any 3 (out of 4) x 10 Marks = 30 Marks

6.3.2. Distribution of Marks in Continuous Internal Assessments

The following procedure shall be followed for awarding internal marks for theory courses. Student must submit two assignments for 4-credit paper (one assignment for 2-credit paper), each carrying 30 marks and average of both will be considered as internal assessment marks. 6.3.3. Passing Minimum

The students are considered as passed in a course if they score 40% marks in the Continuous Evaluation (IA) and Term-End Examinations (TEE) individually. If a student fails in any one component (failure to get 40% marks either in IA or TEE), then he/she will be required to reappear for that component only (IA or TEE as the case may be).

6.3.4. Marks and Grades

Based on the total marks obtained for each course in Internal Assessment and Term End examinations, student will be awarded grade for that course. The following table gives the marks, grade points, letter, grades and classification to indicate the performance of the candidate.

| Range of Marks | Grade Points | Letter Grade | Description |
|-------------------|-----------------|--------------|-------------|
| ≥90 to ≤100 | 10 | A+ | Outstanding |

| ≥80 to <90 | 9 | А | Excellent |
|------------|---|-----|---------------|
| ≥75 to <80 | 8 | B+ | Distinction |
| ≥70 to <75 | 7 | В | Very Good |
| ≥60 to <70 | 6 | C+ | Good |
| ≥50 to <60 | 5 | С | Average |
| ≥40 to <50 | 4 | D+ | Below Average |
| <40 | 0 | F | Re-appear |
| ABSENT | 0 | AAA | ABSENT |

For a semester:

Grade Point Average [GPA] = $\sum i C_i G_i / \sum i C_i$

Grade Point Average =

Sum of the multiplication of grade points by the credits of the courses

Sum of the credits of the courses in a semester

C_i = Credits earned for the course i in any semester

G_{*i*} = Grade Point obtained for course i in any semester.

n refers to the semester in which such courses were credited

For the entire programme:

Cumulative Grade Point Average [CGPA] = $\sum n \sum i Cn i Gn i / \sum n \sum i Cn i$

 $\mathsf{CGPA} = \frac{\mathsf{Sum of the multiplication of grade points by the credits of the entire programme}}{\mathsf{Sum of the credits of the courses for the entire programme}}$

7. Requirement of the Laboratory Support and Library Resources

7.1. Laboratory Support

For practical courses (programming and coding) in syllabus, Learners will have access to lab guide for unguided exercise and online tools to carry out practice of suggested exercises. Video tutorials will be provided for better understanding of concepts and methods to practice. Lab based virtual classrooms in Learning portal will guide students about the laboratory support to the learners in order to carry out practical exercise covered in the programme. There shall be provision of a practical guide made available for learners.

7.2. Library Resources

Directorate of Online Education, Manipal University Jaipur, Rajasthan has excellent Library facility with adequate number of copies of books in relevant titles for MCA programme. The Central Library of Manipal University, Jaipur is also having good source of reference books. The books available at both the libraries are only for reference purpose and lending services. In addition, reference books as prescribed will be procured. The Digital library access will also be made available to students who are enrolled into online mode of education. In addition, the university membership on Swayam/ NPTEL/ Knimbus will also be made available to students. Complete e-Learning resources to course would be made available on Learning management System for learning along with e-tutorial lectures. Further, expert lectures/workshops/ webinars by industry experts would also be conducted for the students.

8. Cost Estimate of the Programme and the Provisions

The cost estimate of the Programme and provisions for the fund to meet out the expenditure to be incurred in connection with M.B.A. Programme as follows:

| SI. No. | Expenditure Heads | Approx. Amount |
|---------|--|----------------|
| 1 | Programme Development (Single Time Investment) | 49,00,000 INR |
| 2 | Programme Delivery (Per Year) | 6,00,000 INR |
| 3 | Programme Maintenance (Per Year) | 27,00,000 INR |

9. Quality assurance mechanism and expected programme outcomes

The quality of the programme depends on scientific construction of the curriculum, strongenough syllabus, sincere efforts leading to skilful execution of the course of the study. The ultimate achievement of MCA programme of study may reflect the gaining of knowledge and skill in management area. Gaining of knowledge and skills in IT may help the students to get new job opportunities, upgrading their position not only in employment, but also in the society,

The benchmark qualities of the programme may be reviewed based on the performance of students in their end semester examinations. Also, the feedback from the alumni, students, parents and employers will be received and analysed for further improvement of the quality of the programme.

Manipal University, Jaipur has constituted Centre for Internal Quality Assurance (CIQA), which will assist Director, Directorate of Online Education to conduct periodic review and assessments and assist the Directorate to implement necessary quality measures and

effectiveness in programme delivery. CIQA is constantly involved in reviewing all materials prepared by DOE, including syllabus, SLMs and e-learning content. CIQA will be involved in conducting studies to measure effectiveness of methods adopted for learning. As we proceed further, CIQA will involve in benchmarking quality of academic delivery, and perform various analyses, and guide all stakeholders towards upgrading quality constantly.

Centre for Internal Quality Assurance Committee (CIQAC) chaired by the Vice Chancellor consisting of internal and external experts oversees the functioning of Centre for Internal Quality Assurance and approve the reports generated by Centre for Internal Quality Assurance on the effectiveness of quality assurance systems and processes.

In addition to CIQA, as per the guidelines of National Assessment and Accreditation Council (NAAC), Manipal University, Jaipur has constituted Internal Quality Assurance Cell (IQAC), in which academicians, industry representatives and other stakeholders are nominated as members. The IQAC is a part of the institution's system and work towards realisation of the goals of quality enhancement and sustenance, as quality enhancement is a continuous process. The prime task of the IQAC is to develop a system for conscious, consistent, and catalytic improvement in the overall performance of institutions. The work of the IQAC is the first step towards internalization and institutionalization of quality enhancement initiatives.. IQAC's elementary motive is to promote measures for institutional functioning towards quality enhancement through internalization of quality culture and institutionalization of best practices.

The guidelines on quality monitoring mechanism prescribed by the UGC have been adopted by the Centre for Internal Quality Assurance for conducting institutional quality audits, to promote quality assurance and enhance as well as spread best-in-class practices of quality assurance. University has setup an effective system for collecting feedback from the stakeholders regularly to improve its programmes. The University will conduct self- assessments regularly and use the results to improve its systems, processes etc. and finally quality of programmes.
